PartsBrokerDirect®

Seller Workflow

The Simplicity

#1: PBD sets you up using your idle rules to market and match your parts to a buyer.

#2: Via inventory collection, parts are matched with potential buyers.

#3: PBD reviews all parts, requested quantities and offers with the potential buyer and secures approval.

#4: Offers are emailed to the seller for review.

#5: If the seller chooses to sell any requested quantity on the offer, the match is confirmed and both parties are notified through email regarding dealer information.

PBD follows up with both parties to confirm proper shipment and receipt of parts
